Ettimadai: The man with a passion for extra-terrestrial intelligent beings, having 37 years of varied teaching experience both in the corporate arena and educational institutions. He loves the Universe and all its mysteries and wants to learn and know more about it. His deep felt wish and prayer is the total and complete transformation of the world for good.

C. S. Udhayakumar, associate professor of Amrita University, feels and intuitively knows that the whole Universe is teeming with intelligent extraterrestrial life forms and with their own civilization and culture. Udhayji is doing his own informal serious study and research on the subject, trying to know and understand the various ET beings and races personally in his own unique ways. He uses telepathy, wishes, prayers, meditations and contemplation to directly know and establish an ongoing contact and communication with them. "I know, deep in my heart, that they are all there. We are not only, not alone but were never alone! We human beings are the latest arrival on the planet and we are just taking our first few baby steps."

When asked about how he 'believes' in something he has not seen yet in person, he said, "Your heart knows what is factual or false, real or unreal. I have some intuitive sense. I fully trust my own heart." When asked whom does he love the most in this world, he replied, "I love myself, the true 'myself', the most in this world."

Udhayji's fervent dream is 'a world completely free of poverty, money and the banking cartel, diseases, greed, deceit and lies, corruption in all forms.' In short, a

beautiful planet filled with abundance for every form of life, free energy, clean environment, ongoing contact with ET civilizations, true education, and lot of love and care for all the children and their children of the world, and he wishes that his dream be fulfilled at the earliest. He surely does not want this 'world to be like this' (the present situation of planet).

He doesn't give much importance to physical yoga, except as a methodical way to maintain health and well being of the body. He believes in the 'Real Yoga', which is all about enlightenment, self-realization, god-realization and knowing about the universe and one's deep inter-connection with it. He conducts and facilitates a weekly gathering called 'Satsang' (in the Yoga Hall, ASB building) for all those students and staff, in fact for anyone who is deeply interested in all the higher things of life and life itself, where he tries to inspire and awaken young minds with whatever little he has learned and understood over the years. We feel that he has been able to - to a large extent – inculcate a lasting interest and a sincere desire to know and understand much more than what one could possibly get in and through a formal school curriculum or university education and eventually make many of them see the importance and significance of what he, and people like him, are trying to do.

Before he was brought into Amrita by Amma herself, he was into corporate training programmes in the industry and educational institutions in Chennai. He is a devotee of Amma, as well as many other 'Awakened Beings' like Sri Ramana, Sri Ramakrishna, Sri Aurobindo, Swami Vivekananda, J.Krishnamurti, Maharaj, and also in recent times beings like Mooji, Eckhart Tolle, Bentinho Massaro, Jeff Foster and many others, and the list goes on! He is inspired by their life and teachings and their tremendous, unconditional love. He feels that Amrita is a 'fantastic, beautiful, nature fresh place to grow up, not in a physical sense, of course, but more so inwardly. When asked about one thing he doesn't like in Amrita, he hesitatingly told that it's the immaturity of many of the faculties.

"I find his classes boring. I don't find his teachings practical. It's not possible in the real world. But, I agree to the fact that he is a great human being. He is one-of-a-kind person", said an MCA student who didn't want to reveal his name.
